

TRENDS IN HW/SW CO-DESIGN

User and Vendor Strategies

TABLE OF CONTENTS

1.0	METHODOLOGY AND SCOPE	1-1
2.0	INTRODUCTION TO HW/SW CO-DESIGN	2-1
3.0	EXECUTIVE SUMMARY	3-1
4.0	THE BIG PICTURE OF THE HW/SW CO-DESIGN LANDSCAPE	4-1
4.1	Purpose	4-1
4.1.1	Evolution of HW/SW Co-Design from Art to Science to Practice.....	4-1
4.1.2	Embedded System Requirements.....	4-1
4.1.3	HW/SW Co-Design Definition	4-3
4.1.4	Traditional (Non-Embedded Computing Centric) Design.....	4-4
4.1.5	Embedded Computing Design Constraints	4-9
4.1.6	What Is Not HW/SW Co-Design.....	4-10
4.1.7	Early Binding of SW and HW Approach.....	4-11
4.1.8	Late Binding of SW and HW Approach.....	4-11
4.1.9	System Design Specification	4-12
4.1.10	Homogeneous Specification and Key Sponsors	4-12
4.1.11	Heterogeneous Specification and Commercial Applications	4-15
4.1.12	Need for a New System-level Specification Language	4-19
4.1.13	Key Findings—Big Picture Overview	4-19
4.2	Motivations and Value Proposition of HW/SW Co-design.....	4-20
4.3	Classification of HW/SW Systems.....	4-21
4.4	Key HW/SW Co-design Issues	4-22
4.4.1	Classes of HW/SW Co-Design Issues	4-22
4.4.2	Components of HW/SW Co-design Issues.....	4-22
4.5	Embedded Systems Overview.....	4-23
4.5.1	Trends and Issues	4-23
4.5.2	Required Design Management Techniques	4-24
4.6	Model of the HW/SW Co-Design Process.....	4-25
4.6.1	Partitioning.....	4-27
4.6.2	Scheduling	4-29
4.6.3	Analysis and Validation	4-31
4.6.4	Backend.....	4-31
4.6.5	Academia and Industry Approaches	4-32
4.6.6	HW/SW Co-Design Methodology—A Summary	4-33
4.7	Current Status of HW/SW Co-Design Technology	4-35
4.7.1	“Ideal” HW/SW Co-design Environment.....	4-37
4.7.2	Investment Requirements and EDA Industry.....	4-38
4.7.3	Fragmentation Analogy With AMS Market	4-39
4.8	Major HW/SW Co-Design Research Efforts	4-40
4.9	Major HW/SW Co-design Commercial Tool Efforts.....	4-40

5.	THREE DETAILED VIEWS OF THE HW/SW CO-DESIGN METHODOLOGY	5-1
5.1	Summary of Detailed Views	5-1
5.1.1	Backend Flow View—Summary	5-1
5.1.2	Frontend/Co-synthesis Flow View—Summary	5-2
5.1.3	Analysis and Validation Flow View—Summary	5-3
5.2	Compilers—Achilles Heel of HW/SW Co-Design Backend.....	5-7
5.2.1	Introduction	5-7
5.2.2	Compilers	5-10
5.2.3	Design Tools for Backend Embedded (Processor) Software Development.....	5-13
5.2.4	Compilation Technology Trends.....	5-14
5.3	Design Specification and Description Language Issues and Trends	5-16
5.3.1	Introduction	5-17
5.3.2	Specification Languages Overview	5-19
5.3.3	Specification Language Issues	5-21
5.4	Design Analysis and Validation	5-22
5.4.1	Introduction	5-22
5.4.2	Co-simulation	5-24
5.4.3	Co-verification	5-27
5.4.4	Emulation and Prototyping.....	5-29
6.	VENDORS AND USERS OF HW/SW CO-DESIGN.....	6-1
6.1	Introduction	6-1
6.1.1	Hardware Emulation Approach	6-3
6.1.2	Platform-based Approach.....	6-4
6.1.3	Electronic System-level (ESL) Approach	6-5
6.1.4	Representative Commercial Tools	6-6
6.2	Role and Business Strategies of Commercial Design Tool Makers	6-8
6.2.1	“Cosmic Dust” in HW/SW Co-Design Space	6-9
6.3	Role and Research Strategies of Academic/Research Design Tool Makers	6-11
6.3.1	Representative Frontend Systems	6-12
6.4	Trends and Needs of Design Tool Users	6-16
6.4.1	Representative Government/Military Users	6-17
6.4.2	Representative Automotive Industry Users	6-19
6.4.3	Representative Telecommunications Industry Users	6-20
6.4.4	Representative Smart Card Industry Users	6-21
6.4.5	Representative Multimedia Industry Users	6-22
7.	REPRESENTATIVE SUCCESSFUL IMPLEMENTATION.....	7.1
7.1	Mars Rover	7.2
8.	ABOUT THE PETROV GROUP	8-1

TRENDS IN HW/SW CO-DESIGN

User and Vendor Strategies

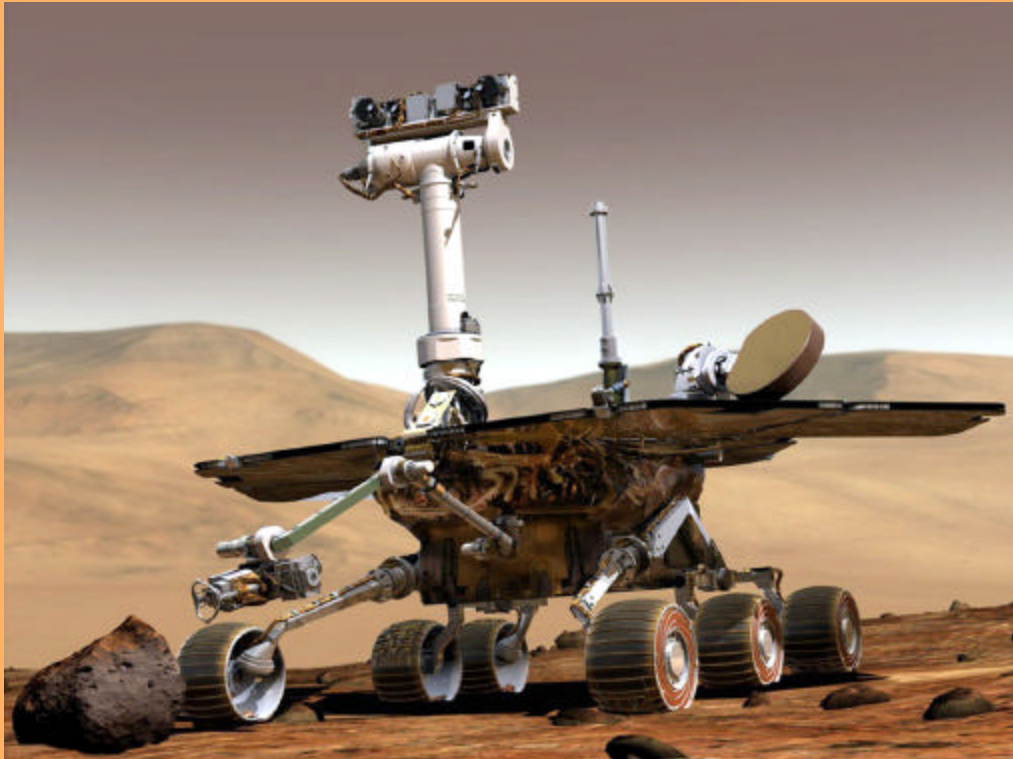

LIST OF FIGURES

1.	Concept View of Embedded (Computing) System Design.....	4-4
2.	IBM Chip Design System: The Big Picture	4-5
3.	Two IC Design Mega Trends in the Sub-90nm Semiconductor Industry	4-6
4.	The New Integrated Chip Design and Manufacturing Space	4-6
5.	Coral Tool System and Methodology	4-7
6.	Multi-language Specification and Co-design Assisted Example	4-18
7.	Example of Generic HW/SW Co-Design Methodology	4-25
7-1	Example of Generic HW/SW Co-Design Methodology	5-8
6-1	Multi-language Specification and Co-design Assisted Example	5-31
7-2	HW/SW Co-Design Theater.....	6-1

Trends in HW/SW Co-Design

User and Vendor Strategies

SUCCESSFUL IMPLEMENTATIONS IN A RANGE OF APPLICATIONS

A DETAILED ANALYSIS OF TRENDS AND OPPORTUNITIES
